DETAILED ACTION

This office action is in response to applicant's remarks filed June 2, 2009.

Allowable Subject Matter

Claims 35, 37-39, 68, 71-75 are allowed.

The following is an examiner's statement of reasons for allowance: while the use of stacking chips with various adhesives are known in the art as exemplified in the cited art, the prior art does not disclose or make obvious attaching the chips to a substrate with an adhesive having a lower curing temperature than the adhesive attaching the chips. Applicant discloses that CTE mismatch is minimized by having the lower curing temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses in: PGPub (2003/0122236) attaching chips with an adhesive being curable from 150 to 200 degrees and that the adhesive used to attach the chips to a substrate can be any adhesive; in Honma (JP 2002/252326) the softening temperature of the adhesive attaching the chip to the substrate being lower than the adhesive attaching chips; Chang (U.S. 2002/0058357) stack chips attached to each other and substrate with adhesive with curing range from 100 to 150 degree.
